

Performance Analytics for Salesforce Einstein

Improve your contact center performance

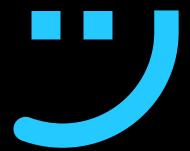

CXone Performance Analytics for Salesforce Einstein is an Al-powered analytics application that delivers specific recommendations to improve contact center performance. In just a few clicks, get precise insights to boost first contact resolution, agent efficiency and sales productivity—no coding or data specialists required. CXone contact center interaction data is linked directly to Salesforce, creating a complete view for analytics to uncover insights and offer predictions into the benefits and risks behind suggested optimizations. Plus, this highvalue contact center analytics application is FedRAMP authorized and PCI compliant.

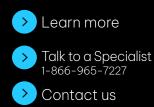

DRIVE REAL IMPROVEMENT WITH DATA-DRIVEN DECISIONS

Use data-driven recommendations and predictions to ensure any changes you make will lead to better results.

- Discover exactly where and how to improve your contact center KPIs with targeted recommendations.
- Assess the impact of changes before you implement them using data-backed predictions.
- Ensure positive outcomes using detailed datadriven insights.

BENEFITS

- Reduced operational costs
- Improved customer satisfaction
- Increased sales revenue
- Reduced risk
- Strengthened compliance
